

Frozen Pasteurised Yolk 10% Sugared

Egg yolks separated from quality farm fresh eggs blended with 10% by weight pure sugar, the mixture is then pasteurised and blast frozen

Applications

Ideal product to bind, emulsify and thicken ice cream, fruit butter, liquor and sweet pastries.

Advantages

The addition of sugar retains the functional properties of egg yolk during frozen storage. A consistent natural product conveniently supplied and easily used. No need for messy separation and no associated shell and egg white wastage.

Quality Guarantee

Extensive controls and testing procedures as recommended by FSANZ are conducted in our "ON SITE" food laboratory to assure high quality. All products sold by us or our authorised distributors are fully guaranteed, if stored as recommended.

Packaging

Frozen Pasteurised Yolk 10% Sugared is available in 10kg cartons utilising the "bag in the box" system. This consists of a durable outer carton with strong resealable inner bag.

Storage

The product should be maintained at -18°C. Once thawed, the product should be refrigerated between 0°C and 4°C.

Recommended Thawing Procedure

Under no circumstances should heat be applied to the package to accelerate thawing.

1. When frozen cartons are received, note down the carton codes on the delivery dockets and rotate stock.
2. Approximately 48 hours before use remove the plastic inner from the carton and place in a clean sanitised tub - label with product name, code and time.
3. Leave tub with plastic inner in a chiller - temperature less than 4°C.
4. Once thawed, the products should be kept refrigerated between 0°C and 4°C and used within 72 hours. Mix well before use.

Shelf Life

2 year shelf life from date of manufacture if stored as recommended. Once thawed store as recommended and use within 72 hours.

Shell Egg Equivalent

1kg of Frozen Pasteurised Yolk 10% Sugared once thawed is equivalent to the amount of yolk separated from approximately 45 medium sized eggs.

Pallet Quantity

90 x 10kg cartons per pallet.
